Landing Page Accessibility Audit

Target level: WCAG AA
Source: inline-html

Critical	High	Medium	Total
1	4	3	8

PM summary

> The audit found 8 accessibility issues. Prioritize critical and high-severity fixes before release, then address medium issues that affect navigation, labeling, and structure.

CRITICAL issues

Low inline color contrast - WCAG 2.1 1.4.3

Selector: div

Inline foreground/background colors have contrast ratio 2.54:1, below the 4.5:1 target.

Fix: Adjust text or background color to increase contrast ratio.

HIGH issues

Missing document title - WCAG 2.1 2.4.2

Selector: head > title

The page is missing a meaningful <title> element.

Fix: Add a concise page title that describes the current document.

Image missing alt text - WCAG 2.1 1.1.1

Selector: img

An image element has no alt attribute.

Fix: Add alt text, or use alt="" for decorative images.

Form control missing accessible label - WCAG 2.1 1.3.1

Selector: input

A form field has no visible label or accessible name.

Fix: Associate a <label>, aria-label, or aria-labelledby with the control.

Interactive element missing text alternative - WCAG 2.1 4.1.2

Selector: a

A link or button has no readable text or aria-label.

Fix: Add visible text or aria-label describing the action.

MEDIUM issues

Missing document language - WCAG 2.1 3.1.1

Selector: html

The root <html> element has no lang attribute.

Fix: Set lang on the html element, for example <html lang="en">.

Missing main landmark - WCAG 2.1 1.3.1

Selector: body

The document has no <main> landmark or role="main".

Fix: Wrap the primary page content in <main> or assign role="main".

Missing H1 heading - WCAG 2.1 1.3.1

Selector: body

No top-level heading was found on the page.

Fix: Add a single descriptive <h1> for the main page topic.
